The new TCR50-2 crawler dumper offers greater functionality, performance, comfort and serviceability. With an ample 65 degree dumping angle and 3,700 kg maximum loading weight, operator always get a lots of soil discharged with just a single dumping stroke. 180 degree turning dump for efficient sideways dumping reduces the need for unskilled operator to continually reposition the machine and it prevents early wear of rubber tracks.

A completely redesigned operator's station features an intuitive 5.7" color multi-informational display with standard camera view function, hydraulic joystick

controls, adjustable suspension seat, powerful air conditioner, radio with USB support and large cup holder for superior operator comfort and less fatigue. Hydraulic joystick controls deliver smooth operation for travel function and dump body function while foot throttle allows more economic and intuitive operation for engine speed.

Wide opening maintenance cover provides exceptional access to engine and routine inspection points. Standard fuel transfer pump enables operator to refill the tank with fuel more easily and quickly.
